

## **Paintball CO2 Adapter Wont Screw on to my Paintball Tank or Leaks**

We here at Brew Innovations have started to see off-shore manufactured paintball tanks that are having issues fitting our Paintball CO2 Adapter. This fitment issue can cause leaks and/or not screwing all the way in to the adapter.

We have identified a new thread specification that allows both domestic and international Paintball Co2 Tanks to fit perfectly.

We will modify your existing CO2 adapter “free of charge” if this is your issue. Please contact us at [info@octopustap.com](mailto:info@octopustap.com) for more details and shipping instructions.

Cheers
