

THE OCTOPUS TAP™

POUR 4 BEERS AT ONCE!!

Quote:

"I just got this tap and tried it out for my friend's b-day. No one had to wait for beer and as long as she remembered to ice the keg there was no foam either! Also I thought it would need to be pumped a lot, but it didn't need it. Definitely the most unique and cool tap out on the market. A necessity for someone who gets a lot of kegs."

- Jason from Virginia Tech

Product Details

- Serves up to 4 Beers at once*
- Vertically Integrated to NADS Bronco Pump™
- High Capacity Hand Pump
- Up to 300% increase in flow
- Available as an adapter only or fully assembled tap with hoses

ADDITIONAL DETAILS:

Benefits

- Can pour 1, 2, 3 or 4 beers at once from a keg
- Dramatically reduces the line at the keg
- Moves groups away from the keg
- Kegs empty much faster, resulting in more beer sales for liquor stores
- Great conversation piece at parties

Product Variations

- Stainless Steel: 3 hoses, very durable, pours extremely well
- Plastic injection molded: 4 hoses and made of durable Noryl plastic, significantly cheaper than the steel version, pours extremely well
- Available in American and European Sanke

Common Questions

Do you have to pump more? Depends on how many taps are open. With all taps open, yes you have to pump more, you are pouring 3x more beer.

Does it cause beer to foam? No. There are many reasons beer foams, but a properly maintained Octopus Tap™ will not foam any more than a standard Bronco Pump™

Why is the 3 Port more expensive than the 4 Port?

The 3 Port is made of Stainless Steel where the 4 Port is made of durable Noryl plastic

Is it Patented?

Yes we have an issued US Patent with additional Patents Pending

Also Available:

- CO2 adapter to replace Bronco Hand Pump
- Mini-CO2 Refillable System
